An altered level of consciousness is any measure of arousal other than normal. Level of consciousness (LOC) is a measurement of a person's arousability and responsiveness to stimuli from the environment. A mildly depressed level of consciousness or alertness may be classed as lethargy; someone in this state can be aroused with little difficulty. People who are obtunded have a more depressed ...

Asthma (or Asthma bronchiale) is a disease that hurts the airways inside the lungs. It causes the tissue inside the airways to swell. Asthma also causes the bands of muscle around the airways to become narrow. This makes it hard for enough air to pass through and for the person to breathe normally. Asthma also causes mucus-making cells inside the airways to make more mucus than normal.

Si suppone che la fibrosi cistica sia apparsa nel XXXI secolo a.C. circa a causa della migrazione di popoli, delle mutazioni genetiche e delle nuove condizioni di nutrimento. Anche se l'intero spettro clinico della malattia non è stato riconosciuto fino al 1930, alcuni aspetti della condizione erano stati individuati molto prima.
