v and mathematical ideas. I think some of them are fun, but many of the things that excite students about computer science, like graphics, sound and

Think Java: How to Think Like a Computer Scientist

Java is a general-purpose computer-programming language that is concurrent, class-based, object-oriented, and specifically designed to have as few implementation dependencies as possible. It is intended to let application developers "write once, run anywhere" (WORA), meaning that compiled Java code can run on all platforms that support Java without the need for recompilation.
