Waste water treatment is a process used to convert wastewater into an effluent that can be returned to the water cycle with minimum impact on the environment, or directly reused. The latter is called water reclamation because treated wastewater can then be used for other purposes. The treatment process takes place in a wastewater treatment plant (WWTP), often referred to as a Water Resource ...

4. Case Study . At a sewage treatment plant in Florida tests were conducted with the V-inline. 4000 grit separator at speeds varying from 1750 rpm to 3150 rpm.. The higher the separator speed, the higher the centrifugal force generated and the higher the removal efficiency for grit solids.
