In physics, string theory is a theoretical framework in which the point-like particles of particle physics are replaced by one-dimensional objects called strings.It describes how these strings propagate through space and interact with each other. On distance scales larger than the string scale, a string looks just like an ordinary particle, with its mass, charge, and other properties ...

2. Fabrication of microneedles. Individual small needles have been hand-crafted for research purposes for decades and already in the 1970's low-cost microneedle arrays were envisioned for drug delivery .However, it was not until the 1990's that the microelectronics industry provided the microfabrication tools needed to make microneedles suitable for pharmaceutical applications .
